Subject: Meeting about Devon Loop Subdivision up Airport Road

County Commissioners,

There was not time in the meeting this morning to mention the difficulty in emergency services access to homes down Airport Road east of Illinois Bench. If you put yourselves in our situation living down that road, would you want have a medical emergency and have to be bounced around in the back of an ambulance going 5 mph down our road? If your house was burning down, how would you feel if the fire truck had to drive 5 mph down the road to get to your house? Your house could be basically burned down by the time the fire truck was able to get there. As the road exists, emergency service access is questionable in some places including the one car width loop – Devin Loop. I just wanted to make this point that I was not able to voice at the meeting. Thank you for your time in meeting with us and hopefully we can get something resolved in a timely manner.

Thanks again,

Stephanie Roebke
